DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on February 24, 2009 has been entered.

Cancellation of claim 3 has been entered.

Claims 1-2 and 4-17 are pending in the instant application.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mark L. Beloborodov on May 6, 2009.

In the title,

The title has been replaced in its entirety with the following text:

--DISPLAY PANEL COMPRISING CONDUCTIVE BARRIER STRUCTURES--

In the claims,

Claim 2 is canceled.

Claim 1 has been replaced in its entirety with the following text:

-- A display panel formed on a substrate and comprising a plurality of display pixels with at least one light emissive layer and at least one electrode layer deposited on or over said light emissive layer, wherein said display panel further comprises electrically conductive structures shunting said electrode layer, wherein two adjacent ones of said electrically conductive structures are continuously covered by said electrode layer; wherein said display pixels are separated by barrier structures forming said electrically conductive structures and said electrode layer contacts said barrier structures for shunting said electrode layer; and wherein said barrier structures of adjacent display pixels are in direct electrical contact with each other.--

Claim 4 has been replaced in its entirety with the following text:

--The display panel according to claim 1, wherein at least one insulation layer separates said light emissive layer from said barrier structures.--

Claim 5 has been replaced in its entirety with the following text:

--The display panel according to claim 1, wherein said barrier structures comprise side walls being covered by a hydrophobic insulation layer, such as an amorphous silicon layer or a photoresist layer as an insulating spacer layer. --

Claim 6 has been replaced in its entirety with the following text:

--The display panel according to claim 1, wherein said barrier structures comprise side walls having a substantially inclined orientation with respect to said substrate, said side walls being covered by an anodized insulating spacer layer.--

Art Unit: 2879

Claim 7 has been replaced in its entirety with the following text:

--The display panel according to claim 1, wherein said display panel further comprises structures to locally separate said electrode layer.--

Claim 8 has been replaced in its entirety with the following text:

--The display panel according to claim 1, wherein said barrier structures are available at or near at least one edge of the display panel.--

Claim 9 has been replaced in its entirety with the following text:

--The display panel according to claim 1, wherein said barrier structures are at least partially covered by at least one light absorbing electrically conductive layer.--

Claim 11 has been replaced in its entirety with the following text:

--The display panel according to claim 1, wherein said barrier structures are fully reflective or covered with a reflective layer and said display panel further comprises a polarization layer.--

Allowable Subject Matter

Claims 1 and 4-17 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the references of Prior Art of record fails to teach or suggest the combination of the limitations as set fourth in claim 1, and specifically comprising the limitation of "wherein said barrier structures of adjacent display pixels are in direct electrical contact with each other", in combination with the remaining limitations. This

Art Unit: 2879

limitation has not been found, taught, or suggested by the prior art of the record which makes this claim allowable over the prior art.

Regarding claims 4-11 and 16, claims 4-11 and 16 are allowable for the reasons given in claim 1 because of their dependency status from claim 1.

Regarding claim 12, the references of Prior Art of record fails to teach or suggest the combination of the limitations as set fourth in claim 12, and specifically comprising the limitation of “wherein said barrier structures of adjacent display pixels are in direct electrical contact with each other”, in combination with the remaining limitations. This limitation has not been found, taught, or suggested by the prior art of the record which it makes this claim allowable over the prior art.

Regarding claims 13-15 and 17, claims 13-15 and 17 are allowable for the reasons given in claim 12 because of their dependency status from claim 12.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Response to Arguments

Applicant's arguments filed on February 24, 2009; with respect to claims 1 and 12 have been fully considered and are persuasive. The rejection of claims 1 and 12 has been withdrawn.
